

## WHAT WE DO

The principle purpose of DRH is to secure and maintain a good quality of life for it's service users.

We aim to assist our service users to meet all their basic physical needs and to address universal human needs such as:-

- Safety & emotional security
- A need for attention
- A need for emotional connection
- Fun, friendship and intimacy
- Autonomy and control
- A sense of privacy
- A sense of competence and achievement
- A sense of status
- To feel part of a community
- A sense of purpose through being stretched

We will assist service users to meet these needs in accordance with their specific wishes and preferences.

We will identify any barriers, which prevent service users from meeting their needs and, wherever possible, work to minimise or remove these barriers.

We will achieve this aim through the implementation of relevant person centred support plans that specifically address each basic need.
